

Scanox Marker HD

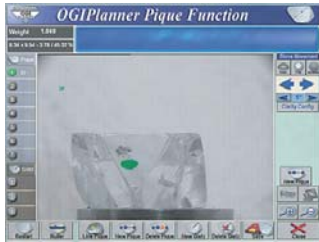

High Resolution Laser Marking System

With the Scanox Marker advanced optical lenses and HR Digital Camera, you can achieve the highest degree of viewing and mapping of the pique, and hence the optimal and most accurate marking line.

Scanox Marker HD, coupled with the Best Value Feature from the OGI Rough software, is an integral unit, offering the ultimate solution package to measuring, inclusion identification, planning and marking of rough diamonds.

Inclusion Plotting

Multiple Stone Planning

Best Value Planning

Advanced Automatic Marking

Product Highlights:

- Advanced Laser marking unit for visible and extremely accurate laser line
- High Resolution Digital Camera for identification of the smallest visible inclusions
- Precise Dual Laser Scanner for optimal mapping of holes & grooves
- Marking options for all facets for sawing and polishing
- Fast marking time
- Innovative Multi Lenses provide consistency in diamond measurement of any size
- New algorithms allows precise mapping of rough stones for achieving the optimal yield from the stone and maximization of profit
- Compatible with OGI's Rough & Polished Software

*Most Accurate Laser Marking
for Optimal Yield and Maximum Profit*
