

Scanox Proportion HD

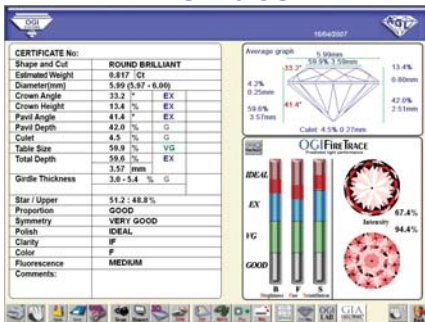

High Resolution Proportion System

Scanox Proportion offers the foremost HD solution for achieving a perfect 3D model, featuring proportions, symmetry and extra facets.

The Scanox HD Proportion system is based on an HR Digital Camera which achieves a perfect 3D model. The enhanced CCD sensor in the camera provides the sharpest and clearest diamond image possible, for best viewing of essential details. The Scanox Proportion HD is compatible with OGI's Polished Software.

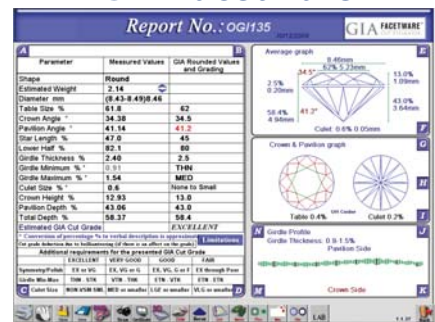

FireTrace®

Recator

GIA Facetware™

Product Highlights:

- High Resolution Digital Camera to achieve a perfect 3D model
- New Algorithm allows you to view full measurement and symmetry of each facet
- Measures and grades diamonds in accordance with major labs, such as GIA, HRD Antwerp, IGI, EGL and more
- Compatible with OGI's Polished Software, such as CutGrade, GIA Facetware, FIRETrace® and Recator
- Innovative Multi Lenses provide consistency in diamond measurement of any size
- Designed for use in labs that require maximum accuracy
- Fast measuring time

The Foremost Solution for Measuring and Grading of Brilliant Polished Diamonds
