

CoMARKER-P™

Automatic USB Laser Marking System

In 1999 OGI made a revolution in the rough world with the creation of the first Automatic Rough Marking machine. Today, once more OGI takes a step forward and brings you a new invention: the CoMarker-P™, an Automatic USB Marking System. This invention makes the marking machine as simple as Windows Plug n' Play.

- USB controller
- Internal micro laser
- Internal video card
- High resolution camera
- New LED light button for optimal viewing of the rough stone
- LED signal laser marking
- New marking algorithm that increase the marking speed
- Advance laser mapping to detect grooves and holes
- Windows® XP and Vista Plug n' Play
- Supports OGI Rough® software

This laser marking system operates with USB connection on laptops (adaptable also to Macintosh laptops)
